<b>Office Action Summary</b>	<b>Application No.</b> 10/550,554	<b>Applicant(s)</b> MIKAMI ET AL.	
	<b>Examiner</b> Peter D. Mulcahy	<b>Art Unit</b> 1796	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 26 September 2008.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-9 and 11-37 are rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Hsu et al. US 2002/0120082 or Halasa et al. US 2005/0131181 each taken alone and in the alternative.
4. The rejection set forth over Favrot et al. in the previous actions is withdrawn. This is not necessarily in view of the remarks or amendments filed by applicant, but rather, the closer prior art now of record.
5. Hsu and Halasa each show the polymerization of 1,3-butadiene with the claimed amine containing functional compounds using lithium amine compounds, see Hsu [0019], [0020] and [0027] and Halasa at [0068] and [0073]-[0079]. Solution

Art Unit: 1796

polymerization using hydrocarbon solvents is shown at [0073] of Halasa and [0040] of Hsu. The use of ethers, and chelating agents is discussed at [0035]-[0037] and [0045] of Hsu and in Halasa at [0088] and [0099]. Tire compositions further incorporating carbon black are shown in Halasa at [0106] and Hsu at [0052]. There are no significant amounts of "PCA's" used in either composition. It should be further noted that while most claims are directed to compositions, the inventive rubber component is defined by how it is made rather than what it is. Such being the case, the claims are essentially treated as product-by-process claims. This is to say that there is no discernable difference between the rubber components of the art and that as claimed. As such, each of the claim limitations are anticipated and the claims are not novel. In the event that one of ordinary skill would not immediately envisage the claimed limitations then the claims are prima facie obvious given that each of the claimed components is disclosed and suggested to be used in combination with one another. One of ordinary skill would be motivated to use the components in combination as claimed given the direct suggestion to do so.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter D. Mulcahy whose telephone number is 571-272-1107. The examiner can normally be reached on Mon.-Fri. 8-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Wu can be reached on 571-272-1114. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
